Experience

IT Help Desk / Security Support July 2021 – Sept 2023
Neobot Tech *Lagos, Nigeria*
- Handled access management for staff in Microsoft 365 and Entra ID, including permissions and MFA.
- Took part in incident response, triaging security issues in the ticketing system and escalating them.
- Supported the security awareness program, reminding staff how to spot phishing and protect accounts.
- Wrote security procedures for MFA setup, password resets and access requests that staff could follow.

Confined Space Watch (On-Call Contracts) April 2024 – August 2026
Industrial Safety Watch (New Gold, Highland Valley Copper, Kruger) *Kamloops, BC*
- Watched gas detector readings during shutdowns, acted right away on alarms and got crews out safely.
- Followed Lockout/Tagout and isolation steps exactly and logged every confined space entry and exit.

Information Desk Volunteer August 2025 – November 2026
Royal Inland Hospital *Kamloops, BC*
- Helped patients and families at a busy front desk, staying calm and clear when people were stressed.
- Looked up patient records for families while following hospital privacy rules for sensitive information.
- Trained and onboarded new volunteers on desk procedures and the patient lookup tool.

Support Services Worker July 2024 – November 2026
Interior Health Authority *Kamloops, BC*
- Checked every patient meal tray against its diet order before delivery, so each patient got the right meal.
- Rotated food stock using first in, first out, and kept work areas in line with food safety standards.
- Trained new team members on food safety and kitchen safety steps.

Projects

Network Intrusion Detection System | *Cisco Modeling Labs, Cisco IOS, ACLs, Syslog* January 2026
- Built a 4-node Cisco home lab with ACL firewall rules that block unknown hosts and log every attempt.
- Set up Syslog alerts showing each intruder's source IP, protocol and destination.
- Tested the detections by simulating intruders and confirming each attempt was blocked and logged.

Phish & Malware Guard | *JavaScript, Office.js, Python, FastAPI, Microsoft Graph API* Sept 2026
- Built an Outlook add-in and FastAPI back end that checks emails for malicious code, bad URLs and phishing.
- Warns the user and sends confirmed threats straight to a security inbox through the Microsoft Graph API.

AI Inbox & Invoice Triage Agent | *Python, Flask, SQLite, Ollama, vLLM, GitHub Actions*
- Wrote a Python agent that sorts emails and invoice PDFs and flags phishing and suspicious files for review.
- Scored it on 105 test cases for accuracy, speed and cost, and backed it with 49 automated tests.
- Set up GitHub Actions to lint the code and run the tests on every push.

Skills

Security Operations: Alert triage, incident response, root cause analysis, log review, phishing analysis
Security Tools: CrowdStrike (EDR), Splunk (SIEM), Snort (IDS), Nessus, OpenVAS, Wireshark, Nmap, Syslog
Systems & Cloud: Windows, Linux, Microsoft 365, Entra ID, Active Directory, Azure, AWS, Cisco IOS
Frameworks & Network: NIST CSF, ISO 27001, CIS Controls, OWASP Top 10, pfSense, Palo Alto
Scripting: Python, PowerShell, Bash, SQL, Git, GitHub Actions
Soft Skills: Explaining tech clearly to anyone, careful with details, quick to learn, team player

Education

Thompson Rivers University Kamloops, BC
Diploma in Computer Network and Cybersecurity | ***GPA: 3.83/4.33*** *Expected Graduation: April 2028*
- Coursework: Security Operations & Incident Response (triage, timelines, containment, evidence, recovery)
- Available for a co-op term from January 2027 | Willing to relocate anywhere in Canada

Certifications

CompTIA Security+: In Progress
